## TESTIMONIALS

"I was fortunate enough to attend Shannon's educational workshop for cultural sensitivity. She is fully engaging and enhances the presentation with anecdotes, energy, and passion. She is alive during her presentation and it is informative! She is obviously well-prepared, rehearsed, poised, and confident. I was able to learn about culture and clinical practice and she kept me wanting to learn more." - E.P.

"Your speech on Leadership really influenced me. You made me realize that leadership isn't power, it is influence. You have inspired me to compliment people more, put down my phone, and make face to face connections. This will in turn help me network myself better and also have a better outlook on what leadership really is." - M.C.

"I really resonated with your story and your messages about life, leadership, and friendship really inspired me. I felt like you understood me despite never meeting me. Thank you for connecting with me as you did. It truly made an impact on my life." - B.I.
